

The **10th Congress of the Iranian Ceramic Society** by the purpose of introducing latest research and educational advances in the field of Ceramic Science & Technology will be held on **May 5th & 6th 2015** in **Tehran, Iran**.

The Congress allows researchers to present their recent achievements and results in the form of oral and poster presentations in the following major topics:

1. Novel Synthesis & Processing of Ceramic Materials
2. Carbon & Ceramic Matrix Composites
3. Optical & Transparent Ceramics
4. Magnetic & Electro-Ceramics
5. Ultra High Temperature Ceramics
6. Ceramics Thin Films & Coatings
7. Nano / Bio Ceramics
8. Glass and Glass-Ceramics
9. Ceramics in Energy and Environmental Applications
10. Educational & Research Challenges in Iran
11. Modern Technologies in fields of Tile, Porcelain, Refractories and Raw Materials

The conference topics will encompass ***the entire spectrum of Advanced Ceramics*** as well as ***employing modern technologies in the Conventional Ceramics***. In the margin of the congress an ***exhibition*** of the latest products and achievements of ceramic industries is going to be set up. Well-known international invited speakers from different countries will present the latest issues in field of ceramic science and engineering in this conference.
